Alluvial geoarchaeology: Floodplain archaeology and ...

A site at the edge of the floodplain at Chogi Mami, dated to 7500 bp, provides probably the earliest evidence of irrigation canals (Roberts, 1989). Later occupation of the floodplain (6500 bp) took place on levees and allowed the abstraction of water through the levees down onto the flood basins, the edges of which could be used for crops.

Managed floodplains (Chapter 8) - Alluvial Geoarchaeology

Alluvial Geoarchaeology Many archaeological sites are buried by alluvium in floodplain and terrace settings. Finding and studying these sites can provide new insights into how river systems evolved throughout the Holocene. This topic has long been a staple of Geoarchaeology, given the close relationships between peoples and rivers.
