Bayesian Ideas

And Data Analysis

The Bayesian method combines expert scientific information with data using Bayes Theorem to obtain such probabilities.

Dennis Lindley, a famous Bayesian, has asserted that there are two rules in Bayesian inference: (i) all uncertainty is modeled using probability and (ii) always obey the laws of probability.

Bayesian Ideas

And Data Analysis

Data Analysis

The appropriate statistical analysis of data involves a collaborative effort between scientists and statisticians.

Exemplifying this approach, Bayesian Ideas and Data

Analysis focuses on the necessary tools and concepts for modeling and analyzing scientific data. Data sets and codes are provided on a supplemental
