I was working on a Cambridge gas heater today for the first time today. What was happening is the unit would come on full fire and I would get about 5.5" at the burners. Then about 1 min. later it drop to about 2.5" and blow cold air. The burners never dropped out,then it would go back to full fire, and it would just repeat the cycle. This was the first time I worked on one of these units and ...
