We define character disturbance as the relative absence of neurosis. And neurosis, simply stated, is the ability to experience inner anguish and anxiety as a result of guilt and shame (i.e. conscience). So, the less neurotic someone is and the more character disturbed they are, the more problems they're likely to bring to a relationship.

Character Disturbance—The Phenomenon of Our Age, the new book by George K. Simon, Ph.D., does two things really well: It paints a no-nonsense picture of how people with personality disorders, including sociopaths, behave. And it explains why traditional psychotherapy, in attempting to understand these individuals, gets it so wrong.

So, today we are facing a near epidemic of what some theorists refer to as character disturbance. Neurosis is still with us, but for the most part at functional as opposed to pathological levels. That is, most today experience just enough apprehension and internal turmoil when it comes to simply acting on their primal urges that they don't in fact "just do it."
