SOURCE: priming fuel system on a 8.1L diesel engine 2001chev 1 ton dual Well, one problem is, if its an 8.1, its not a diesel. The 8.1, or Vortec 8100, is a gas engine. The DuraMax is a 6.6 engine. There is usually not a priming system on a gas engine, because the fuel pumps will usually get it through the smaller filters used quick enough you dont need them.

How to bleed zd30 engine diesel pump - Fixya

One of the reasons a fuel pump might be having trouble doing its job could be that the fuel pump relay is faulty. The fuel pump relay is what activates the fuel pump to supply fuel to the engine. When you start your ignition, the fuel pump provides an electric current to the fuel pump so that it can carry out its job.
