My power steering hose on the return line blows off after you start the truck up in extremely cold weather (-5 or below). This has happened at least 4 times in the past 3 years. After the last time I added an extra clamp but this did not work. I just took it in to a garage, the mechanic checked out the hose, and ps radiator and said all was fine.

Hydraulic power steering systems work by using a hydraulic system to multiply force applied to the steering wheel inputs to the vehicle's steered (usually front) road wheels. The hydraulic pressure typically comes from a gerotor or rotary vane pump driven by the vehicle's engine. A double-acting hydraulic cylinder applies a force to the
