Herbicide Resistance - Bayer CropScience LP

Herbicide resistance, particularly in black-grass, is a major threat to the sustainability of UK arable farming – it is a problem the farming industry can't ignore. Key to managing resistance is understanding how it develops at a cellular and field scale. To test your herbicide resistance knowledge, we've created a quiz which assesses your understanding of the different types of resistance, how to test for resistance, how to manage resistance in the field and much more!

How much do you know about herbicide resistance?

The lack of new resistance-breaking herbicides is a serious issue that threatens the sustainability of current agricultural production models. New and effective herbicides have to be found fast, which is why Bayer invests significant resources in herbicide discovery, weed resistance research, and the future of weed control.
