ISO 12944-5:2007 describes the types of paint and paint system commonly used for corrosion protection of steel structures. It also provides guidance for the selection of paint systems available for different environments and different surface preparation grades, and the durability grade to be expected.

ISO - ISO 12944-5:2007 - Paints and varnishes — Corrosion ...

ISO 12944 Standard ISO 12944 addresses a protective paint system that can prevent corrosion in carbon or low-alloy structural steel. This coating system delays the corrosion of the metal because it can seal off the surface of the steel from the local microclimate that surrounds it and would otherwise generate rust.

ISO 12944 - Corrosion Protection of Steel By Protective ...

ISO 12944 The ISO 12944 standard aims to assist engineers and corrosion experts in adopting best practices in corrosion protection of structural steel in new constructions. It is a widely adopted and globally accepted industry standard, recognised by specifiers worldwide.

ISO 12944-2018 - Nippon Paint

ISO12944 is the industry standard for corrosion protection of steel structures by protective paint systems. Originally released in 1998, the standard is put together by representatives from key countries and companies involved in the protection of steel structures to build a mutually beneficial standard.
