Laser acupuncture is also effective and often shown to be as effective as needle acupuncture for a variety of problems. Effectiveness is enhanced because laser acupuncture allows you to treat points you otherwise might not be able to treat, due to patient age, sensitivity, or fear.

### **Laser Acupuncture in Your Practice: What you Need to Know**

Laser therapy, in general, is safe and can be often used where other physical modalities are contraindicated such as with pacemakers or metal implants. 17 Laser phototherapy can be of value in the mitigation and elimination of many painful conditions. 18 Laser phototherapy is easily applied to patients and has relatively short treatment times, depending on the power output of the device, the wavelengths used and the size of the area to be treated.
