Multi-user Computing FAQ - Getech

Users share one virtualized server desktop environment in the form of individual terminal sessions instead of separate operating environments. This shared virtual desktop environment can run on servers in a central data center or on a physical PC in a workgroup, call center, or classroom. Multiple users share a single OS.

| NComputing

The MX-series is our latest 3-user thin client kit, replacing both the X- and M-series. Available in both LAN and PCIe configurations.

Software Downloads | NComputing

So you buy a server and install vSpace for Linux. It's replacing all those computers and hosts your virtualized desktops, probably in another room where you can't see or hear it. You give each of your users a keyboard, mouse and monitor, then plug them into an NComputing access device like the RX300. Connect to your network via LAN or WIFI, and now each of your people have their own virtual computer with support for the latest Windows operating systems.

vSpace for Linux | NComputing
