Questions. 1. An electron is travelling along the x-direction. It encounters a magnetic field in the y-direction. Its subsequent motion will be ... The working of dynamic is based on the principle of. Electromagnetic induction.

Important Questions of Electrostatic Potential and ...

Download File PDF Question Answer Based On Electrostatic

Answer/Explanation. Answer: c

Explanation: (c) The positively charged particle experiences electrostatic force along the direction of electric field, hence moves in the direction of electric field. Electric potential decreases in the direction of electric field. Thus, positive work is done by the electric field on the charge.
