In Ruby Under A Microscope I'm going to teach you how Ruby works internally. I'll use a series of simple, easy to understand diagrams that will show you what is happening on the inside when you run a Ruby program. Like a physicist or chemist, I've developed a theory about how things actually work based on many hours of research and study.

Dark red gems like garnet reddish pink tourmalines can be mistaken for rubies. Genuine rubies often are a vivid, deep red color (like a stoplight) that is consistent and even throughout the stone. Look for imperfections using a 10x microscope or magnifying glass. Lab-made rubies contain blemishes and bubbles.
